

# Toad<sup>®</sup> for Oracle on Mac

Elevate your Oracle database operations from a whole new place... your Mac!

Millions of developers and DBAs worldwide can now experience the ultimate productivity tool for Oracle database professionals from their Mac iOS systems. Mac users can now take advantage of efficient database management, seamless collaboration and cross-platform support to save time, reduce risk and lower operational costs without compromise.

Create high-quality, bug-free applications built to perform and scale in production while automating tasks that have hindered previous organizational proactivity and productivity. With Toad<sup>®</sup> for Oracle on Mac, you can minimize risks that come with change, maintain optimal quality and prioritize time with more strategic tasks.

Built on input from Oracle experts and millions of members of the Toad World<sup>®</sup> community, Toad for Oracle has evolved into the most advanced solution of its kind.

**“We found that Toad has come up with new tools and more capabilities in these tools. So it was a no-brainer for us to pick Toad.”**

*Senior Manager, Database Management*

## Capabilities

- Bring your database developers into your DevOps processes seamlessly
- Enable development teams to collaborate and share projects, codes and reports

- Achieve the highest levels of code quality, performance and maintainability with less manual effort
- Manage admin tasks across your Oracle databases
- Identify and quickly diagnose the root cause of performance inefficiencies and minimize risks to the production environment
- Deploy new apps or modify existing apps with greater confidence
- Leverage a community of millions, including peers and experts

## Benefits:

- Shorten development cycles by creating higher-quality code with fewer defects
- Clearly define, find and protect sensitive data across all your Oracle databases
- Implement consistent and repeatable processes and best practices
- Pinpoint and resolve database performance issues quickly
- Automate tedious SQL optimization tasks
- Manage, automate and schedule complex and routine database admin tasks
- Ensure production scalability with automated performance testing
- Use new DB Health Scan to consistently monitor your database for potential risks/vulnerabilities in performance or configuration

Essential Functionality	Toad for Oracle Pro DB Admin Subscription
Single user subscription billing (12-month term)	✓
Security testing following SSDLC lifecycle	✓
SQL & PL/SQL editor with debugging	✓
Schema browser	✓
Graphical query builder	✓
PL/SQL code profiler	✓
Task automation	✓
utPLSQL unit testing	✓
Schema and database compare report	✓
Compare table data with sync	✓
Test data generation	✓
Data sub-setting and masking	✓
Code quality analysis	✓
Report on use of sensitive data (Sensitive Data Awareness)	✓
Personal and sensitive data scanning and protection (Sensitive Data Protection Module)	✓
Database browser and monitor	✓
Schema database compare with sync	✓
Compare multiple schemas	✓
Database health check	✓
Trace file browser	✓
LogMiner (transaction recovery)	✓

Toad for Oracle for Mac is available with our Professional DB Admin Subscription edition.
