Quest® On Demand

Your go-to SaaS dashboard for tackling Microsoft 365 and Entra ID challenges in a hybrid world.

You've moved to Microsoft 365 and Entra ID, and in your ever-evolving hybrid Microsoft environment, the next challenge never stops. Managing users and workloads while avoiding security risks, coexistence challenges and the pitfalls of compliance will be difficult. Add in the constant consolidation required with merger and acquisition activity along with the risk of trying to manage all of these projects with native tools, and you're looking at a daunting task.

Quest On Demand is a secure, Azure-hosted SaaS management platform to help IT teams, partners and MSPs move faster, tighten security and stay in control of hybrid Microsoft 365 environments. Migrate, manage, report, secure and recover all hybrid AD and Microsoft 365 workloads across all tenants from a single dashboard.

With Quest On Demand, you'll conquer Microsoft 365 tenant migrations and Hybrid AD consolidations to support current and future M&As and accelerate Microsoft 365 adoption and ROI. Reduce your attack surface and stay ahead of attackers with improved identity threat prevention, detection and response. Quest On Demand delivers actionable insights with in-depth reporting across all workloads and tenants, measures usage and adoption to optimize license cost and recover Entra ID from unwanted changes to minimize downtime.
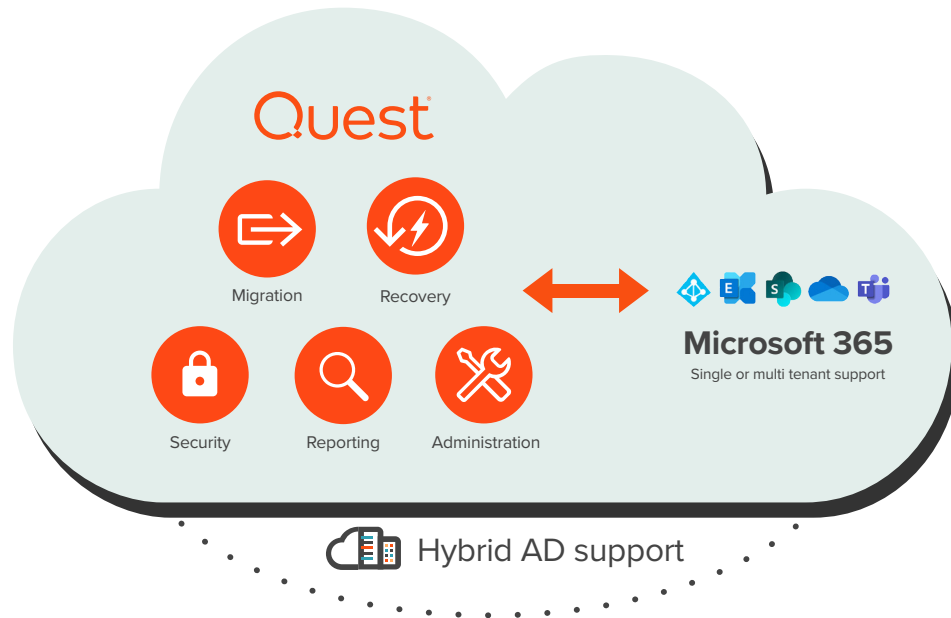

Benefits:

- Extend your cyber resilience posture to the cloud by managing on-prem and cloud workloads from a single portal.

- Achieve the security standards, service level and scalability that you need, backed by award-winning, global support ready to help you 24/7/365.

- Keep up with Microsoft updates Automatic updates deliver new features and security patches quickly and without any effort on your part.

- Improve IT efficiency with a single, unified portal to move, manage and secure all workloads across all tenants and without any PowerShell required.

- Onboard with ease. No installation, no upgrades, no complex configuration — no sweat!

Microsoft 365
Single or multi tenant support

Hybrid AD support

Migrate, manage, report, secure and recover all hybrid AD and Microsoft 365 workloads across all tenants from a single dashboard.

MODULES

On Demand Migration

On Demand Migration is a Microsoft 365 tenant-to-tenant migration tool that allows you to simply and securely consolidate and migrate all your Microsoft 365 tenants running such workloads as Exchange, OneDrive, SharePoint and Teams, as well as on-premises Active Directory and Entra ID. With On Demand Migration, you can accelerate your project by identifying potential issues early, plan and automate your move while also monitoring progress throughout. And simple client configuration helps get your users working efficiently post migration to ensure your Microsoft 365 migration goes as smooth as possible.

On Demand Audit

As you move more workloads to the Microsoft cloud, your reliance on Entra ID will increase, and so will the risk and complexity in securing your hybrid environment. Unfortunately, the Microsoft 365 and Entra ID security logs do not provide

" I've worked in IT in the public sector for 30 years, but I've never done a migration on this scale before and I don't expect to ever do it again. But our 7,000-user account project pales into insignificance in comparison to the migrations that Quest has performed, which can involve 100,000 users or more. Having experienced experts we could count on was essential to our success. "

Dave Littlewood
Strategic Manager for Enterprise Architecture and Governance, Somerset Council

Quest

consolidated views of on-premises and cloud activity, and Microsoft-provided tools do not make it easy to identify exploits, vulnerabilities and suspicious activity. On Demand Audit tracks all configuration, user and administrator changes made across AD, Entra ID, file servers, network-attached storage, Exchange Online, SharePoint Online, OneDrive for Business and Teams. On Demand Audit proactively highlights security vulnerabilities and anomalous activity, and accelerates incident investigations through responsive search and contextual, interactive data visualizations.

On Demand Recovery

Quickly, securely back up and recover Entra ID to eliminate downtime as well as negative impact to end users. With On Demand Recovery, you can run difference reports that compare your backups with live Entra ID to identify cloud-only users or attributes and pinpoint specific changes or deletions. On Demand Recovery also enables you to granularly search and restore exactly what you need — even individual attributes — or recover multiple users, groups and group memberships in bulk without requiring PowerShell scripting so you can mitigate the risk of data loss from human error and save valuable time and resources.

Security Guardian

Security Guardian reduces your attack surface and alert fatigue by prioritizing your most exploitable vulnerabilities and identity configurations that demand attention. From a single, unified interface, you can benchmark current identity configuration against industry best practices and stay ahead of attackers with identity threat prevention, detection and response.

Award-Winning Support

Quest On Demand modules are all backed by an award-winning global support team that is ready to help you 24x7, 365 days a year.

About Quest

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Microsoft 365 migration and management, and cybersecurity resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
